Subject: Active Pro Testimony

I was blown away after using Active Pro for the first time. I am a 24yr old breast cancer previvor who has lived in pain since my Mastectomy. My pain became chronic after my reconstruction when my implant flipped and came out of its pocket. My neck, shoulder, and upper back muscles tore in result on my implant hanging out of its pocket. I tried Active Pro and have been able to stop all pain meds and pain therapy. This has changed my life and I am a better mother because of Active Pro. I cannot thank this product and the creator enough.

-Kelsie B.
